Bear makes it easy to organize your notes in an easy and intuitive way. Use tools like **#tags** to group similar ideas together; or link notes together to build a body of work. You can even record notes on Apple Watch.

Write down your ideas!

Bear is the most elegant way to compose, sync, and store your ***notes.*** on */iPhone, iPad, and Mac./*

Organize and provide **#context** to your notes. Insert **[links]** and **email@adress.es**

Keep your tasks in check:
Clean and tidy to-do with Bear
...with an overall progress bar...

Don't limit yourself to plain text!

Write Your Way

Bear is perfect for all kinda of notes, like quick notes and in-depth essays. There's even a focus mode that helps you stay on task.

Beautiful Writing

Sometimes we need ***more*** than just text on a screen. We need to add emphasis to our words, whether that be through underlining, */italics/*, ***bolding***, or many other ways.

Maybe we need to remember a **[link]**, to remember an **[email@addre.ss]**, or even a **[145 Destination St., Bear, BR]**.

Details in the Writing

Emphasis is important, but writing is so much more than that.

Try out lists:

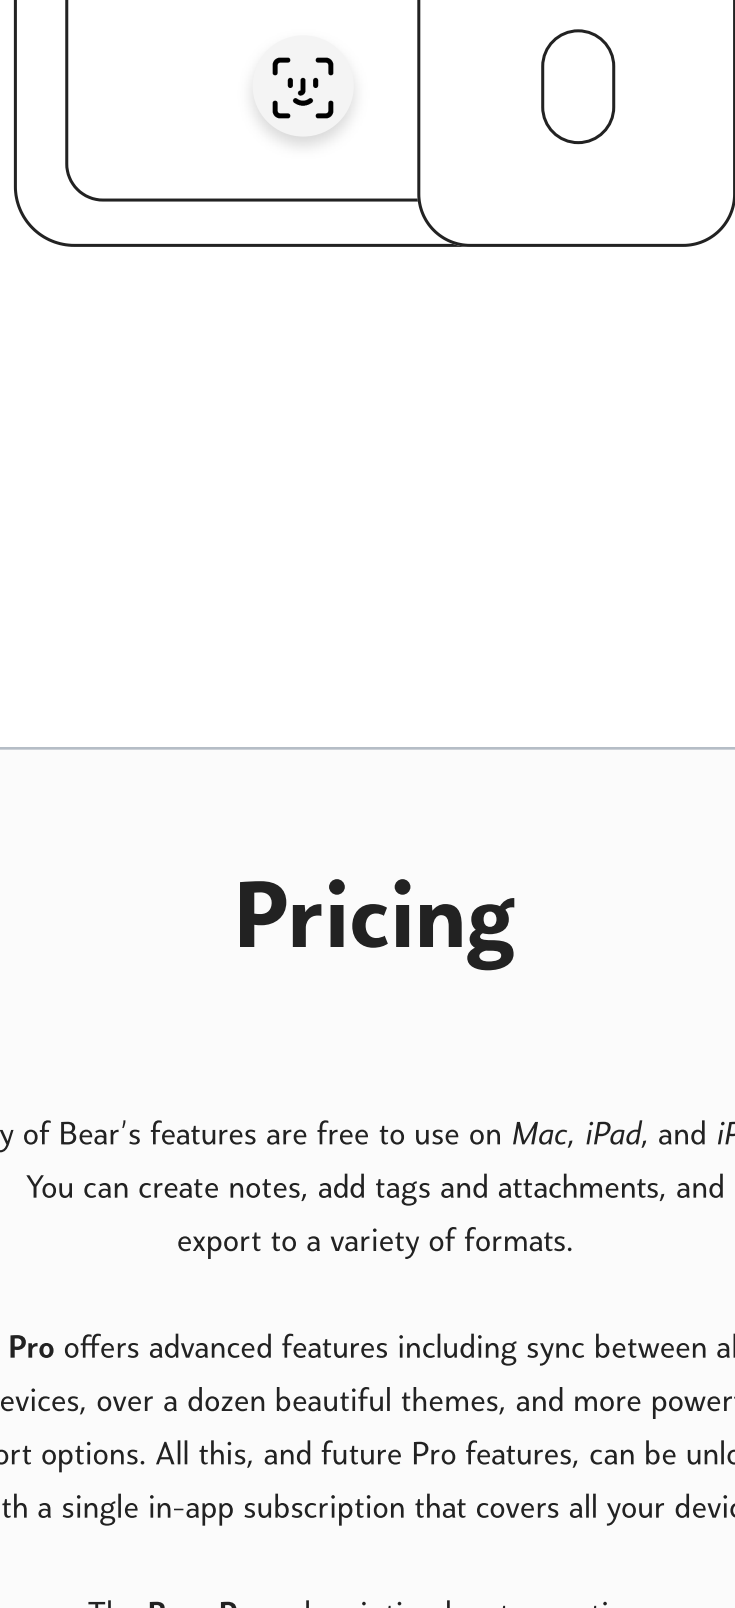

- Because each bullet
- Is super important

/William H. Gass once wrote/

The true alchemists do not change lead into gold; they change the world into words
